Professional Summary

Computer Science Engineering student with hands-on experience in **MERN Stack development**, **Java**, and **Data Structures & Algorithms**. Experienced in building full-stack web applications using React.js, Node.js, Express.js, and MongoDB, with hands-on experience in **AI integration using the OpenRouter API**. Strong understanding of REST APIs, JWT authentication, database management, OOP, API integration, and problem solving. Seeking software development opportunities to apply technical skills to real-world applications.

Education

CMR Technical Campus, Hyderabad	2023 – 2027
B.Tech in Computer Science and Engineering	CGPA: 8.39
Akshara Jr. College, Hyderabad	2020 – 2022
Intermediate (MPC)	CGPA: 9.27

Technical Skills

Languages: Java, C, Python, JavaScript
Frontend: React.js, HTML5, CSS3, Tailwind CSS
Backend: Node.js, Express.js, REST APIs
Database: MongoDB, SQL, Mongoose
AI & APIs: OpenRouter API, AI API Integration, YouTube API
Tools: Git, GitHub, Postman, Axios, Socket.io
Core Concepts: Data Structures & Algorithms, OOP, DBMS

Projects

AI-Powered Food Recommendation System 2025 – 2026

MERN Stack / React.js / Node.js / Express.js / MongoDB / OpenRouter API

- Developed a full-stack food ordering platform using the **MERN stack** with separate user and admin workflows for browsing food items and managing application data.
- Integrated the **OpenRouter API** to provide AI-powered food recommendations based on user preferences, food choices, and requirements.
- Built **RESTful APIs** using Node.js and Express.js to connect the React frontend, MongoDB database, and AI service.
- Implemented **JWT-based authentication** with protected routes and role-based user and admin functionality.
- Used **MongoDB and Mongoose** for managing users, restaurants, products, and application data.
- Designed a responsive frontend using **React.js and Tailwind CSS** with reusable components and efficient state handling.
- Tested APIs using **Postman** and handled CORS, authentication, API errors, and frontend-backend connectivity.

YouTube Clone 2025

React.js / YouTube API / Tailwind CSS / Axios

- Developed a responsive **YouTube-inspired video streaming application** using React.js and external APIs.
- Implemented **video search, category browsing, recommendations, video details, and video playback** features.
- Used **Axios** for API integration and reusable React components for dynamic content rendering.
- Built responsive layouts using **Tailwind CSS** and implemented structured navigation using React Router.

Certifications

Smart Interviews – Program Alpha: Advanced DSA using Java [View Certificate](#)

Achievements

- Solved **700+ Data Structures and Algorithms problems** across multiple coding platforms.
- Completed **Smart Interviews Program Alpha** focused on Advanced Data Structures and Algorithms using Java.
- Practiced advanced DSA concepts including **Arrays, Strings, Linked Lists, Trees, Graphs, Sliding Window, Greedy, Dynamic Programming, and Tries**.

Technical Highlights

- Hands-on experience building **frontend, backend, database, authentication, and API integrations** in MERN applications.
- Experience integrating **AI services using OpenRouter API** and third-party REST APIs into web applications.
- Strong problem-solving foundation with practical experience implementing **Data Structures and Algorithms using Java**.
